

WHITE LEGHORN HEN.

L212761

*By Appointment*

**White Leghorns.** This has become one of the most popular varieties of fancy poultry. They are extensively bred all over the United Kingdom, besides being favourites in the Colonies, on the Continent, and in America, whence they originally came to this country. They are the oldest variety of the Leghorn family, and a very profitable breed of fowls to keep, being excellent layers of large white-shelled eggs.
